

Thank you for downloading!

This resource has been created by Willam van Weelden for HelpEssentials.com.

LICENSING

All free resources made available on HelpEssentials.com, including but not limited to, layouts, skins, scripts, styles, and images can be used in both personal and commercial RoboHelp projects without restriction. No attribution or backlinks are required, but any form of spreading the word is always appreciated!

You are not permitted to make the free resources found on HelpEssentials.com available for sale, rent, or distribution elsewhere.

INSTALLATION

1. Unzip the download file.
2. Open RoboHelp and import the SLZ through the Output (SSL) pod.
3. Replace the logo placeholder in the Screen Layout Editor.
4. Open the Responsive HTML SSL, select the new layout, then save and generate.

CUSTOMISATION

- Change the logo.
- Change the breakpoints to control when RoboHelp shows mobile and tablet views.
